Claim 2, line 2 delete "additionally"

Claim 5, line 3 delete "about"

Claim 5, line 4 delete "about"

Claim 6, line 3 replace "carboxylic acids" with "carboxylates"

Claim 14, line 3 delete "about" (both occurrences)

Claim 15, line 3 delete "about" (both occurrences)

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: Claims 1-19 are allowed over the closest reference, U.S. Patent No. 6,465,551 to Zhao *et al.*

The present invention is drawn to a thermoplastic formulation formed by combining a polymer and at least one nucleating compound represented by formula (I) (see claim for structure), wherein the nucleating compound is intimately associated with an anti-caking agent such that the weight ratio of anti-caking agent to nucleating compound is from about 10:90 to about 30:70.

Zhao *et al.* teaches polypropylene compositions containing disodium bicyclo[2.2.1]heptane dicarboxylate as nucleating agent. This compound is exactly the same compound disclosed in the present invention. Pellets are made from the inventive compositions, although any form may be exhibited. The reference does not teach or fairly suggest use of anti-caking agent. Therefore, the subject matter of the present claims is not anticipated by Zhao *et al.*, and one of ordinary skill in the art would not have found it obvious to arrive at the claimed invention based on the teachings of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
